Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3744

1. Claims 4-7 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on March 16, 2005.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Nose. Nose discloses a solenoid 115-117 for coupling the common valve element 112 and the driving member 101 together when the solenoid is energized.
4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nose in view of Osumi et al. Nose discloses the claimed invention except for the first and second cores and a spring interposed therebetween. Osumi et al teaches a valve having first and second cores 3 and 5 and a spring 14 interposed between the cores. It would be obvious to modify Nose so that the solenoid includes first and second cores and a spring interposed between the cores, in view of Osumi et al, for the purpose of more positively moving the valve member.

Art Unit: 3744

6. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nose in view of Fujimoto et al. Nose discloses the claimed invention except for the seal provided between the shaft and the valve element. Fujimoto et al teaches an expansion valve including a seal member 40 on the shaft. It would be obvious to provide Nose with a seal member, in view of Fujimoto et al, for the purpose of sealing the shaft from leakage. The precise location of the seal on the shaft is considered to be a matter of obvious choice, as no criticality or unexpected results are seen or have been disclosed for the recitation of the seal being located between the shaft and the valve member.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
